

Quality Management in Highway Works involving structural steel products: NHSS 3B

What is NHSS 3B?

NHSS 3B – Particular requirements for the application of ISO 9001:2015 for stocking and distribution activities for structural steel products (Applies to Manufacturers, Importers and Distributors of Structural Steel Products). This standard demonstrates the enhanced quality management system employed by companies that are involved in the stocking and distribution of structural steel products that are to be supplied for use in infrastructure assets.

Why gain NHSS 3B standard?

- Meet the obligations of the Construction Products Regulations placed on importers and distributors of structural steel
- Demonstrates compliance with transportation infrastructure specification quality management requirements
- Increased access to new customers and business partners

SCCS is the only company that certifies this standard and it enables us to sell our steel into highways markets. As a bulk trader we were already certified to 9001:2015 & CARES so NHSS3B was a natural progression for us.

All Steels Trading, SCCS Client

SCCS is the UKAS Accredited Certification Body (0021) specifically for companies engaged in design, manufacture and installation of building materials and associated products and services. The objective of the Scheme is to secure high standards of excellence and quality across all processes, procedures, and practices through independent certification to specific standards. The technical knowledge, practical skills and sector experience the team and auditors bring, makes SCCS the go to certification and auditing providers in the construction industry.
